DESIGNING AND MANUFACTURING THE WORLD'S MOST PRECISE, LEAK-FREE FLUID SYSTEMS

Because there's simply no other alternative.

When it comes to your facility's fluid processing systems, the last thing you need to worry about is the quality and performance of your fittings.

Which is why it's essential to have the most precise, dependable, leak-proof solution in place to ensure your system will function flawlessly time and time again.

That's where Fit-Line Global and our worldwide network of authorized distributors enter the picture. For over 25 years, Fit-Line Global has designed, created and patented the most advanced and cost-

effective fitting solutions for a wide range of high-purity fluid processing applications—including end-users that require SEMI-F57-0301 compliant PFA and PVDF flare fittings.

Fit-Line Global offers standard and custom fittings, from 1/8 inch up to 2 inch components, patented flaring systems, 3-D custom models and more. Fit-Line Global provides you with innovative solutions for your most challenging and demanding fluid processing applications.

INNOVATION STARTS HERE

It's in our DNA. We've continuously evolved to conceive and patent some of the industry's most revolutionary products and innovative technology, including:

- TruFLARE™ System, our patented "tube flaring machine".
- TruFASTENT™, our ingenious preset torque wrenches that help ensure our flared fitting assemblies are leak-free.
- TightFLARE™, Fit-Line Global's proprietary technology that creates repeatable "Female Flare" assemblies for tight spaces.

Fit-Line Global is constantly developing and testing new ideas on a regular basis.

Need a custom solution? Having all of our manufacturing in-house and on-site allows us to take your custom idea from design to a working model in just a matter of days—instead of weeks like other suppliers.

U.S. DESIGNED & MANUFACTURED SOLUTIONS FOR FLUID PROCESSING APPLICATIONS

At Fit-Line Global, we engineer and supply the industry's most popular fitting configurations. That means when you need a fitting, it's available and ready to ship, allowing you to stay up and running and avoid costly delays.

From standard fittings and patented tube flaring systems, to customized designs that are developed, fabricated and tested in our state-of-the-art facility, Fit-Line Global has the expertise and the know-how to ensure you get the most reliable, dependable

components delivered on time, all the time. At our core, we're a company of problem solvers.

Our employees are comprised of some of the best U.S. mechanical engineers, fabricators, senior toolmakers and process technicians with the curiosity, talent, insights and ideas to create the most advanced, dependable and leak-free solutions for all of your fluid processing needs.

ONSITE PRECISION WHEN— AND WHERE—IT COUNTS

We saw the need for an on-site production flaring system that can produce precise, leak-free, repeatable tube flares. The solution? Our patented TruFLARE™ tube flaring system. TruFLARE™ and our Mobile TruFLARE™ system replicate the close tolerances consistent with our patented and proven TightFLARE™ technology. To date, application and installation usage has shown TruFLARE™ tube flaring technology to be far superior than all other existing flaring methods in the industry.

FULL PRODUCT AND PACKAGING TRACEABILITY. ZERO COMPROMISES

Having our materials, manufacturing and packaging in a fully traceable, closed-source system ensures the highest level of protection, component quality and contamination control.

That's why Fit-Line Global employs our own proprietary cleaning and packaging processes—including our five stage component cleaning and

rinsing procedure—all conducted in our very own Class 1000 Clean Room.

And when it comes to packaging, all of our fittings are double polyethylene bagged per SEMI-F57 standards. This will meet and exceed your exacting demands. Anything else simply won't do.

DEDICATED TO YOU

At Fit-Line Global, customer service goes beyond simply taking phone calls; Fit-Line Global is your dedicated source for the solutions to all fluid processing needs. This means that as a valued Fit-Line Global customer, you'll experience unmatched personalized attention, together with the highest quality components, all in a timely basis and at a fair price.

Simply put, Fit-Line Global has the industry expertise and proven track record to deliver the world's most dependable, timely and leak-free solutions for your fluid processing applications.

Mobile TruFLARE™ SYSTEM

Patented “Tube Flaring Machine”

The versatile mobile TruFLARE™ system is ideal for both in-house production and job site flaring. The patented heaters apply uniform heat around the tube to a controlled and repeatable length. Once the heat cycle is complete, the tube end is installed over the forming mandrel. The mandrels are engineered to extract heat evenly from the flared tube end. Applying controlled, uniform heat and extracting it evenly creates a stress-free “formed” flared end. This gives end users the flexibility to flare their tubes days in advance or quickly and consistently at the job site.

KEY FEATURES

- Versatile flaring system, ideal for both in-house production and job site flaring.
- Ability to flare PFA and FEP tubing.¹
- 15' long heater cord allows flaring in hard to reach places.
- Creates precise, concentric, repeatable tube flare ends.
- Automated touchscreen interface with preprogrammed tube settings.
- Exceptionally user-friendly.
- Consistent flares that hold their shape over time.

PATENTED PRODUCT

Mobile TruFLARE™ Systems

Tube Material	Mandrels	Voltage	Part No.
PFA	1/4, 3/8, 1/2, 3/4, 1	110 Volt	MTF416-110-A
PFA	1/4, 3/8, 1/2, 3/4, 1	220 Volt	MTF416-220-A
PFA	1-1/4	110 Volt	MTF20-110-A
PFA	1-1/4	220 Volt	MTF20-220-A
PFA	1-1/4, 1-1/2	110 Volt	MTF20-24-40MM-110-A+
PFA	1-1/4, 1-1/2	220 Volt	MTF20-24-40MM-220-A+
PFA	1/4, 3/8, 1/2, 3/4, 1	110 Volt	MTF416-110-P-A*
PFA	1/4, 3/8, 1/2, 3/4, 1	220 Volt	MTF416-200-P-A*

+ Special Order

* PTFE Mandrels

AUTOMATED TOUCHSCREEN INTERFACE

Select material and tube size and the controller will automatically set the required heat temperature, heat time and cure time. Custom settings can easily be created and saved.

Bench Top TruFLARE™ SYSTEM

Patented “Tube Flaring Machine”

Uniquely engineered, semi-automated bench top flaring system. Creates a standard tube flare end by pressure forming and rapidly cooling the flare form. The bench top TruFLARE™ system is ideal for production flaring. It assures precise, concentric, repeatable tube flare connections. This requires no immediate assembly, which is often the case with other rudimentary hot flaring systems.

KEY FEATURES

- Ideal for production flaring.
- Create precise, concentric, repeatable tube flare ends.
- Automated touchscreen interface with preprogrammed tube settings.
- Exceptionally user-friendly.
- Consistent flares that hold their shape over time.

PATENTED PRODUCT

Tube Material	Flare Mandrel Sizes	Voltage	Part No.
PFA	1/4, 3/8, 1/2, 3/4, 1	110 Volt	TF416-110-A
PFA	1/4, 3/8, 1/2, 3/4, 1	220 Volt	TF416-220-A

For more flaring options, visit: Fit-LineGlobal.com

AUTOMATED TOUCHSCREEN INTERFACE

Select tube size and the controller will automatically set the required heat temperature, heat time and cure time.

TruFASTEN™ TORQUE WRENCHES

Fastens PFA and PVDF nuts to the required torque value which ensures leak-free flared fitting assemblies.

KEY FEATURES

- Wrenches are calibrated to preset torque values based on nut size.
- Wrench claw clicks over when required torque value is reached.
- Ratcheting action allows the nut to be rapidly tightened, making jobs easier and faster.
- Wrenches fit in the palm of a hand easily allowing use in hard to reach places.
- Available for PFA and PVDF nuts.
- U.S. and foreign patents pending.

TruFASTEN™ Torque Wrenches Patent Pending

Nut Size	PFA Part No.	PVDF Part No.
1/4	TFW4-3	TFW4-1
3/8	TFW6-3	TFW6-1
1/2	TFW8-3	TFW8-1
3/4	TFW12-3	TFW12-1
1	TFW16-3	TFW16-1
Complete Set (All sizes listed above)	TFWS-3	TFWS-1

Color coded handles: Blue for PFA Red for PVDF

RATCHETING ACTION

Rapidly tighten nuts to make assemblies easier and faster.

CLICK OVER FEATURE

The claw clicks over when wrench reaches required torque value.

TruFASTEN™

OPERATING INSTRUCTIONS

STEP 1

- Make sure claw is in start position, as shown below in picture A.
- Align teeth on claw with splines on nut, as shown here in Step 1.
- Grip handle firmly and rotate clockwise to tighten nut.

STEP 2

- Rotate handle in a counter clockwise direction, as shown here in Step 2.
- Grip next set of splines with claw and rotate clockwise.
- Continue steps 1 and 2 until claw clicks over, as shown in Step 3 and picture B.

STEP 3

- Snap claw back to its Start Position, as shown in picture A.
- Tighten nut one more time until claw clicks over.

Note: Nut must be tightened twice with wrench.

PICTURE A.

START POSITION

PICTURE B.

FINISH POSITION

Pressure vs. Temperature Graphs

Pressure ratings for 1/4" flares are based on 0.047" wall tubing; 3/8", 1/2", 3/4" and 1" flares are based on 0.062" wall tubing and 1-1/4" flares are based on 0.075" wall tubing.

Pressure ratings for 1/4" flares are based on 0.047" wall tubing; 3/8", 1/2", 3/4" and 1" flares are based on 0.062" wall tubing and 1-1/4" flares are based on 0.075" wall tubing.

WARNING: PVDF not for use in applications exceeding 248° F (120° C)

Fit-Line Global is not responsible for product damage due to accidents, misuse, or improper application usage.

Flow Coefficient (Cv) Data Comparison

- Fit-Line's 1/4" Sweep Elbow is 133% more efficient than a 1/4" Standard 90° Elbow.
 - Fit-Line's 3/8" Sweep Elbow is 67% more efficient than a 3/8" Standard 90° Elbow.
 - Fit-Line's 1/2" Sweep Elbow is 38% more efficient than the competitor 1/2" Sweep Elbow and is 90% more efficient than a 1/2" Standard 90° Elbow.
 - Fit-Line's 3/4" Sweep Elbow is 62% more efficient than the competitor 3/4" Sweep Elbow and is 116% more efficient than a 3/4" Standard 90° Elbow.
 - Fit-Line's 1" Sweep Elbow is 69% more efficient than the competitor 1" Sweep Elbow and is 130% more efficient than a 1" Standard 90° Elbow.

GrabLOC™ Double Containment Fittings (Non-Terminating)

PMBP series panel mount fittings allow the primary and secondary tubes to pass through the fitting body. This allows chemistry to flow back to the supply source if the primary tube leaks.

Features

- PFA Fitting Body
- PVDF Nut

Part No.	Secondary Containment Tubing	A	B	C	D	Panel Mount Hole	Primary Tubing Sizes
PMBP8GLN-1	1/2	2.79	1.11	.29	.50	1-1/4	1/4
PMBP12GLN-1	3/4	3.01	1.13	.38	.50	1-1/2	1/2, 3/8, 1/4
PMBP16GLN-1	1	3.47	1.27	.38	.50	2	3/4, 1/2, 3/8, 1/4

Tubing not included. Shown for clarity only.

MCBP series fittings are used on a box or cabinet that have a female NPT. The primary and secondary tubing pass through the fitting body. This allows chemistry to flow back to the supply source if the primary tube leaks.

Features

- PFA Fitting Body
- PVDF Nut
- MNPT Connection

Part No.	Secondary Containment Tubing	Male National Pipe Thread (MNPT)	A	B	C	Primary Tubing Sizes
MCBP8GL-12N-1	1/2	3/4	2.35	.67	.29	1/4

Tubing not included. Shown for clarity only.

GrabLOC Wrenches

- Ratcheting action.
- Allows nuts to be rapidly tightened.
- Fits easily in the palm of your hand.

Part No.	Nut Size
DCW8-1	1/2
DCW12-1	3/4
DCW16-1	1
DCW20-1	1-1/4

GrabLOC™ Double Containment Fittings (Terminating)

PMDC series fittings are a conventional panel mount connection. The primary tubing passes through the fitting body with a simple push-on secondary tube terminating the tube connection. There is no flaring required of the secondary tube.

Part No.	Primary Process Tubing	Secondary Containment Tubing	A	B	C	D	Panel Mount Hole
PMDC48GLN-1	1/4	1/2	2.62	1.10	.29	.50	1

- PVDF Nut
- MNPT Connection

GrabLOC™ Double Containment Tee

Patent Pending Tubing not included. Shown for clarity only.

WELDED SYSTEMS

Fabricated Manifolds

You can go from your sketch, to a CAD model, to a finished, welded manifold in a matter of days.

From concept to CAD model, fabrication and delivery, Fit-Line Global provides a turn-key solution for fast turnaround of customer-specified manifolds. With over 30 years of fluoropolymer and injection molding expertise, Fit-Line Global's proprietary, patented methods reduce the time needed to create custom manifolds in a matter of days, not weeks.

Manufactured from high purity virgin PFA and PVDF resins in dedicated molds and process equipment, Fit-Line Global's custom manifolds are designed to maximize throughput of aggressive chemistry and ultra-pure water applications, they are available from 1/4 inch to 1-1/2 inch in diameter.

Products & Services Available Worldwide

Visit us at Fit-LineGlobal.com to find
a distributor nearest you.

WARRANTY

Fit-Line Global warrants to the BUYER that any product sold will be free from defects in material or workmanship for a period of twelve (12) months from the date of shipment. If during the warranty period, the BUYER notifies Fit-Line Global of a defect, Fit-Line Global shall, at its option, repair or replace the defective material or workmanship. OTHER THAN AS EXPRESSLY STATED HEREIN, FIT-LINE GLOBAL MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, REGARDING THE PRODUCTS AND/OR SERVICES PROVIDED HEREUNDER, AND EXPRESSLY DISCLAIMS THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. The BUYER shall bear the cost of freight to and from Fit-Line Global's plant. BUYER agrees to accept the limits of liability as expressed in this statement to the exclusion of any and all provisions regarding statements of liability on the BUYER's own invoices, purchase orders and/or other documents.

GOODS

All descriptions and illustrations contained in Fit-Line Global's catalog, brochures, price lists, website, advertisements and all specifications, drawings and any other documents contained therein submitted with any QUOTATION to BUYER or otherwise communicated to BUYER are intended merely to present a general idea of GOODS and SERVICES (GOODS) described therein and nothing contained in any of them shall form any part of the contract.
